A business man writes us:

"My Wife Handles the Money"

"SHE can do it better than I. Each pay day she always deposits our Savings first. We never buy anything unless we have the cash to pay for it, and each year our Savings are growing."

You, too, can pay your bills and save. Our Budget Book will help you plan your income. Ask for a copy.

The Royal Bank of Canada

S601

THOSE who have saved are able to buy, and the man with money in the bank is always ready for any opportunity or emergency.

Determine to save a certain sum—say $100. That accomplished, save a second $100, and you will soon have $1,000 in the bank.

Ask for our booklet, "The Measure of Your Income." It will help you.

Free to green keepers and others who desire the latest information on the building of a new Club Green or renovating an old lawn.

We quote Special Prices to Clubs, Institutions, Parks and others who require seed in large quantities.

LAWNS AND GREENS

It is most important that the lawn should be sown with a mixture of grass seeds especially adapted for the purpose required. A mixture suitable for a Park or Golf Course would be quite unfit for a private lawn, Bowling or Putting green. All the finest grasses that are most suitable for the formation of a lawn when grown for seed, produce very much less weight of seed per acre than do the coarser growing varieties, consequently the cheaper the mixture the coarser the turf. We maintain that the finest dwarf growing grasses are the most economical even for large areas, as the turf formed by the dwarf compact habit of the finest grasses requires to be mown only about half as many times as a turf formed of coarser growing varieties.
